

DATA CENTER COLOR-CODED QUICK DISCONNECTS

COOLING LINE CONNECTORS FOR MAXIMUM FLOW

Flat Face Style

Straight-Thru Style

Built for the future of liquid cooling, Foster Manufacturing's color-coded quick disconnects simplify service and protect uptime. Now available in two distinct styles to fit your application needs:

- **Flat Face Style (Universal Quick Disconnect - UQD)** – A compact, no-spill option featuring color rings on each half of the coupler for easy identification. Rated at 3000 psi with an automatic sleeve for secure, leak-free connections.
- **Straight-Thru Style (FST Series)** – Designed for maximum flow, with hard anodized, color-coded sleeves for instant hot/cold line identification. Rated at 300 psi with manual sleeve retraction. Available with Viton seals (-15°F to +400°F) or EPDM seals (-40°F to +300°F).

Product Highlights

- OCP-Compliant
- Engineered specifically for liquid cooling applications
- Available in multiple sizes: 1/4", 3/8", 1/2", 3/4"
- Fast visual identification reduces errors
- Built-in spillage protection for sensitive electronics
- Modular and scalable to grow with your system
- Fully aligned with industry best practices

Whether you need high-flow performance or compact, no-spill security, Foster provides everything you need to connect, cool, and maintain with confidence.
