To Whom It May Concern:

Ideal Clamp Products, Inc., located in Smyrna, Tennessee, Brownsville, Texas, and H. Matamoros, Tamaulipas, Mexico, have confirmed dates with SRI to complete their IATF 16949:2016 and ISO 9001:2015 registration renewal audits on August 3-5, and August 10-13, 2021, respectively.

Ideal Clamp Products, Inc. had originally been slated to conduct their renewal audit events by March 29, 2021. However, due to SRI capacity capabilities as a result of IATF rules in response to the global pandemic, the IAOB has granted a waiver and gave Ideal Clamp Products, Inc. an extension that will allow the audit to occur in August.

Ideal Clamp Products, Inc.'s IATF 16949 and ISO 9001 certificates will expire on July 8, 2021. The IAOB has granted an automatic six-month extension to all IATF certificates; hence, the IATF certificate will be in good standing until January 8, 2022. The ANAB, however, requires at least a portion of the audit be conducted in order to extend a certificate; therefore, the ISO 9001 certificate will lapse but will be reinstated following the audit.

Once the audits have been completed and any nonconformance found are closed by the SRI Auditor, all details connected with Ideal Clamp Products, Inc.'s renewal will be compiled and submitted to the SRI Registration Review Panel (RRP). The registration certificate will be received shortly after review and approval by SRI's RRP members. In the meantime, this correspondence will substantiate Ideal Clamp Products, Inc.'s current "in-process" status.

SRI looks forward to working with Ideal Clamp Products, Inc. in their continuation of IATF 16949:2016 and ISO 9001:2015 registration. Please contact me with any questions.

Sincerely,
